

neovim

 cmd , ()

```
sudo apt-get install neovim
```

```
## install gcc build env
sudo apt-get install build-essential
sudo apt-get install cmake

### could not find luajit
sudo apt-get install luajit

## Could NOT find Gettext
sudo apt-get install gettext libgettextpo-dev

# get source
git clone https://github.com/neovim/neovim.git

cd neovim

#switch stable branch
git checkout stable

make CMAKE_BUILD_TYPE=RelWithDebInfo

sudo make install
```

```
# danny @ 1b159a1c7726 in ~/workspace/neovim on git:v0.10.3 o [18:30:03]
$ nvim --version
NVIM v0.10.3
Build type: RelWithDebInfo
LuaJIT 2.1.1713484068
Run "nvim -V1 -v" for more info

# danny @ 1b159a1c7726 in ~/workspace/neovim on git:v0.10.3 o [18:30:13]
$
```

基于 cmd 安装, (有可能版本会比

nvim

```
mkdir -p ~/.config/
git clone https://github.com/netfl/t/nvim-cpp.git nvim
nvim ./
```

```
